

GIAI Hepa Air Purifier

Breathe Healthier Air:

Air purifiers remove up to 99% of airborne bacteria. The EPA estimates that indoor air is 2 - 5times dirtier than outdoor air, sometimes even as much as 100 times dirtier.

Remove Odours:

Air purifiers don't only clean the air, they also help get rid of unpleasant and burnt food odours (not that you ever burn your food!), smoke, pet odour, garbage odours, etc. Leaving your home smelling fresher.

Traps Airborne Allergens & Assist with Asthma:

Air purifiers help combat a variety of allergens by trapping them before they settle into your home. A HEPA Air purifier can combat allergens and asthma triggers, such as pet dander and fur, accumulating dust, seasonal allergens, mould spores, dry skin cells, fumes, radon gas, pollen and bacteria.

Prevents Spread of bacteria & Germs:

Worried about catching your children's flu? Your spouse's cold? The HEPA air purifiers can capture and neutralize 99% of the germs that you want to avoid. Air purifiers fit everywhere: They come in a variety of features that will keep the air healthy in any room of the house..

Features:

- Four-layer filter, filtering less than 0.0001mm
- Adjustable airflow
- Interval timer 1, 2, 4 & 8 Hours
- Ozone output: 500mg/hr
- Effective coverage area of 80sqm
- Wall or desktop mounted ozoniser with hepa filter.
