

HYPERTHERMIC OXYGEN AND CARBONIC ACID TRANSDERMAL TECHNOLOGY

The HOCATT™ Plus is a multi-technology natural wellness device that can deliver up to 10 of the world's most effective alternative health and beauty modalities all in one system.

WEIGHT-LOSS

WELLNESS & DETOX

ANTI-AGING

PERFORMANCE ENHANCEMENT

What would you say if someone told you that you could slow the hands of time, lose weight, boost your athletic performance and MORE, simply by sitting and relaxing for 30minutes?

so... WHAT IS THE HOCATT™?

The **HOCATT™ Plus** is a Multi-Technology, natural wellness chamber that delivers a combination of powerful, alternative health and beauty modalities, perfectly sequenced to boost energy, detoxify and oxygenate the body, strengthen the immune system and enhance circulation.

Transdermal Ozone

When Ozone is introduced into the blood, it reacts with oxidizable substrates, killing viruses, bacteria and fungi, enhances blood circulation, and stimulates the Oxygen metabolism of the body.

Hyperthermia

Hyperthermia is one form of hyperthermia Technology, which mimics a fever state resulting in an effective natural process of detoxifying and stimulating healing processes, with all the same healing effects as the natural fever.

CO₂ / Carbonic Acid

Carbonic Acid is better known for its potent vasodilation ability of the skin blood vessels, which stimulate circulation, and oxygenation of the skin. For this reason, this modality is popularly used in cosmetic and reconstructive surgery centres and high-end spa's and beauty salons.

Micro Currents

Micro Currents is an FDA approved Technology that can be applied in a variety of treatment modalities, Micro currents can assist with a wide variety of conditions, including pain and aches, nervous system, mental and physical, wellbeing and much more.

Far Infrared

Far Infrared is a low energy Technology where waves of light penetrate the human body, transforming into heat energy to gently elevate temperature and activate major bodily functions. Benefits include: reduced muscle & joint pain, lower hypertension, sooth digestive issues, & much more.

Oxygen Respiration

Pure, humidified, oxygen runs through a special oxygen jet to the nose and mouth, boosting Oxygen saturation in the body during the HOCATT™ session.

Ultrasonic Cavitation

The Ultrasound field creates bubbles in the liquid, which implode when they get a certain size. Energy in the form of heat and pressure is released. Ultrasonic Cavitation allows for non-invasive removal of fat deposits. It improves skin texture, reduces cellulite, and tightens connective tissue.

Photon Color Light

This state-of-the-art digital lighting Technology (LEDs) generate a variety of coloured lights to which the body reacts. In the HOCATT™ two colour stars change randomly to display multi-colour cross fades; from soothing and relaxing to balancing and energizing.

Essential Oil Infusions

The Essential oils are infused with the steam as it fills the chamber, making this a transdermal application. Used together has many health benefits.

UV Irradiation

Ultraviolet (UV) irradiation is the preferred method for disinfection. This radiation acts on the epidermis and deeper layers of the skin, where it contributes to the production of protective agents, hormones and vitamins, in addition to its ability to kill bacteria.
