

ALUMINIUM MASSAGE BED

The Perfect Deluxe Massage Bed
for the Masseuse On The Go!

Our Deluxe Massage Bed is designed to be both elegant in design, yet functional for both static and portable use. Crafted from Aluminium, the Deluxe massage bed is sturdy as well as light weight – without sacrificing on the 70cm size requirement for a comfortable working area – with additional cable support to prevent extensive table movement during a massage.

The black and white tone provides an elegant look, and arm rests ensure that your clients will be able to rest comfortable during your session. The foam is a comfortable 4cm, and has three sections with an adjustable backrest for your client's comfort.

The Massage Bed is completely collapsible – meaning you can use it at your spa, or on the move for at-home services!

EVERY MASSEUSE KNOWS: QUALITY MATTERS.

Independent massage therapists know the importance of having a quality portable massage bed. As a massage therapist you may be traveling to many different homes throughout the day. This travel often involves carrying a table through parking lots, walkways, or other areas to get access to your clients' homes. You may also have to go up stairs or take an elevator for the times when you visit a client that lives in an apartment or condo complex. The weight of the bed is essential when you think of how much you will be carrying it.

A portable massage bed should be comfortable and supportive for the client. The bed should be made of lightweight material but also sturdy. A good massage bed should have a supportive head rest. If you're traveling a lot with your massage bed, it's also important that it has carrying handles for portability. A portable massage bed may have adjustable legs so that you can have it at a comfortable level for working. We're proud to say that, at Global Wellness Enterprises, quality matters.
