Promoting endurance and giving your winner the best chance

The Ozone Horse Blanket is fully adjustable and suits horses ranging from Pony to Percheron. Ozone therapy for horses is non-invasive (no needles or insertions), and used in both re-active (compromised horses) and pro-active (sports therapy for copeting horses). Both ambient and therapeutic ozone treatments are dosed by the ozone horse blanket. Used extensively for endurance, flat racing and assisting in reduction of heart rates and metabolic recoveries. A ideal way to reduce acidosis, lactic acid post racing.

Ozone is incredibly potent, and the Ozone blanket allows for non-invasive application of Ozone in the stable yard, paddock, or bushveld (with an electrical generator) - no need to relocate sick or injured horses.

Benefits:

- Pro-active sports therapy;
- Lyme disease;
African horse sickness;
- Sarcomas, muscle injury, cuts and bruises, tendon injuries;
- Hematoma treatment;
- Detox after reaction to de-wormer;
- Successful treatment of head shaking syndome;
- No need to move sick or injured horse

How to use:

- Keep folded on packing folds when not in use to protect the inside pipes and blanket.
- It comes oversized but can be adjusted down to 12-hand ponies.
- Enure that your blanket totally encapsulates your horse o provide a good ozone environment. Use the adjustable straps and velcro gates to fit your horse.
- Product is made from silicone and teflon to ensure durability.
- After use allow to dry and fold back on the packing lines.
- After fitment of the blanket, the horse will not experience any discomfort whilst the ozone is applied.
