

3-in-1 Next Gen SLIMMING System

635nm Red light & 532nm Green light

Freezing | Electro Muscle Stimulation Plates

635nm Red Light

532nm Green Light

Cryo Plate

Cryolipolysis is a unique non-invasive method for the selective reduction of fat cells with controlled localized cooling. This fat freezing Crystallization procedure makes fat cells under a process "apoptosis". Application delivers a great comfortable cooling treatment without oedemas.

How to use:

Step 1:

10 laser beams with continues or pulsed setting. 635nm Red Light Laser and 532nm Green Light laser.

Step 2:

4 cryo pads, with temperatures range between -10 to 4 degrees celcius.

Step 3:

Switch the pads to Electro Muscle Stimulation mode, to tone and tighten the muscle in the area

Why Choose The 3-in-1 Next Gen Slimming System?

1. Market Approved to Overall Body Circumference Reduction
2. Highest success rate of all other laser fat treatment
3. Amazing results in as little a 2 weeks
4. No set-up time, can be used unattended as it is not applied directly onto the skin
5. Irradiation by a specific wavelength of cold source laser
6. Shrinks fat cells instead of killing them making it safer & more effective
7. No bruising, no freezing, no swelling, no downtime.

Specifications

Nett Weight Gross Weight	39 kg 58 kg	Screen size	12.1 Inch Touch Screen
