

Red Light THERAPY BED

5 Different wavelengthes : 450nm | 523nm | 580nm | 635nm | 850nm
 Colour grouping: Blue (450nm) | Green (523nm) | Yellow (635nm)
 Comes fitted with Infrared (IR) as well as near infrared (NIR)

Product features

1. Multi-wavelengths combination
2. Wavelengths: 633nm 810nm 850nm 940nm
3. Pulse 1-15,000Hz
4. External control system
5. Independent wavelengths control, each wavelength pulse
6. High density LEDs, total 41,600LEDs
7. Built-in multi-media, have fun while in treatment
8. Uniform irradiance, irradiance value up to 129mW/cm²

Choice of operating modes

The therapy bed has two operation modes for a customised treatment:

1. Continuous Wave Mode (CW)
2. Variable Pulsed Mode (1-15000Hz)

Multiple pulse increments

The system can change pulsed light frequencies range 1 - 15000Hz

Independent control of wavelengths

You can control each wavelength independently for the perfect dosage each time.

Aesthetically Designed

The therapy bed has an aesthetic, upscale design with the power of multiple wavelengths in pulsed or continuous modes for the perfect combination of form and function.

Wireless control tablet

A wireless tablet controls the therapy bed and allows you to control multiple units from one place

Parameters

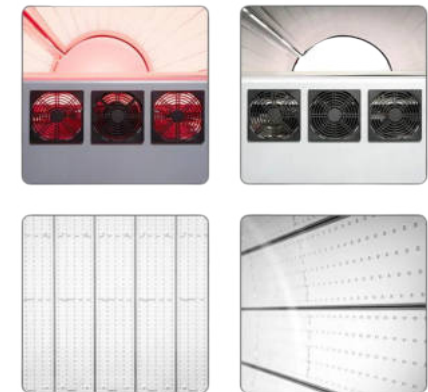

Total LEDs	41600 pcs
Weight	350kg
Dimensions	2250 x 1230 x 1080mm
Power consumption	5200W
Built in cooling capable	Active cooling system
Recommended Treatment Time (Full Body)	10 min sessions

Health care benefits

- Pain management
- Muscle recovery
- Wound healing
- Arthritis
- Improve sleep

Skin care benefits

- Wrinkle removal
- Acne treatment
- Slimming
- Prevent hair loss
