

VShape³

Cellulite and contouring system

VShape³ is the gold standard for the treatment of cellulite and circumferential reduction

80% Of all women over the age of 20 have cellulite, regardless of size or shape. Cellulite occurs when fat cells in the deepest layer of the skin become over-inflated from an increase in fat storage.

The fat cells protrude up through the tissue causing a dimpling or a "cottage cheese" appearance. It uses a combination of bipolar radio-frequency, infra-red, and massage to achieve the desired results.

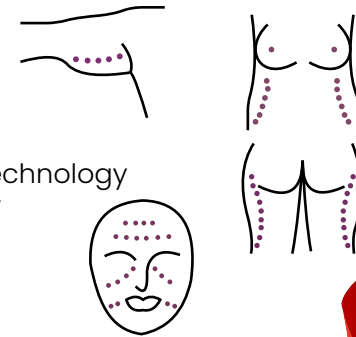

A course of 6 to 8 sessions once a week will produce the best results and each session takes on average 40 minutes and you can return to daily life straight afterward.

Infrared RF Vacuum Roller Slimming Machine is a super device, which gathers the technology of vacuum negative pressure, mechanical rolling and skin folding, applying to all parts of shaping and wrinkle reduction.

Features

- 2 Vacuum handsets
- Precise massage roller technology
- Infrared laser technology
- Ultrasound cavitation
- Bi-polar RF technology

Screen	10.4 inch colour touch screen
Handle number	4 heads available
Handle screen	2.8 inch & 3.5 inch
Handle action area	4.5mm x 9mm x 13mm
	16mm x 25mm (small handle)
	30mm x 44mm (mid handle)
	40mm x 120mm (big handle)
	90mm x 120mm (cavitation handle)
Vacuum	10kpa - 75kpa
Pulse width	1s - 8s
IR wavelength	940nm
Ultrasonic frequency	40kHz
RF frequency	1Mhz
Power supply	AC220V, 50Hz/AC110V, 60Hz

A non-invasive treatment for face and body contouring, and master choice for cellulite treatment
