

Advanced Beauty LED Tanning bed

The best professional choice for your business!

- ✓ Bronze skin
- ✓ Vitamin D and Calcium production
- ✓ Dermal therapy
- ✓ Photon energy

CosmoSun Vertical Tanning bed

6 minutes of vertical tanning with German Cosmedico Cosmosun tanning tubes. It adopts the European fashion vertical full-cabin design, with a simple and elegant appearance, highlighting technology and fashion. The design of the vertical full cabin is more powerful and efficient, and an economical option commercially. It can freely switch the lighting angle at 360°, allowing the skin to absorb more evenly. Combined with the fresh air circulation system, the external fresh air surrounds the body from bottom to top and then discharges. In addition, the vertical design reduces direct skin contact with the equipment making it more hygienic and less cleaning maintenance. Supports Bluetooth MP3 music and has a commercial intelligent management system and a wireless app remote controller.

UVB is ultraviolet rays, a wavelength of 280-320nm, has an erythema effect on the human body and can promote mineral metabolism and Vit D formation. Most of the harmful UVB light has been filtered out in the tanning lamp, leaving only a small part of the useful UVB component. Combined with UVA, so that the skin can be quickly tanned without being sunburned. part of the division of ultraviolet, UVA has a wavelength of 320-420nm, also known as long-wave dark spot effect ultraviolet rays. It has a strong penetrating power; UVA can go directly to the dermis of the skin and tan the skin. The German Cosmosun tanning lamp contains more than 97% UVA, and the tanning result is more durable.

Product Specifications:

Wattage	57 x 180 Watt Tanning tubes
Voltage	110/220V and 13 KW
Dimensions	Length 230cm x Width 123cm x Weight 280kg
Colour	White or black
Treatment time	6 Minutes
