- ✓ 100% Natural Zero side effects
- ✓ Improved blood circulation
- ✓ Disinfection
- ✓ Destress & relax
- ✓ Beauty benefits

Far Infrared Hydrogen Pedi Foot Spa

Electrostatic magnetic field Pedi spa turns the Pedi spa water into electrolyzed water. Our body needs a variety of trace elements, and you can now supplement these trace with the process of Electrolysis. The water in the Pedi Spa turns into alkaline water under the catalysis of sodium chloride.

It produces large amounts of negative ions such as hydrogen, sodium hydroxide, and small amounts of chlorine. Hydrogen, sodium hydroxide, and other negative ions enter the body through the skin's epidermal cells, neutralizing acids and removing free radicals. The best body detox through your feet whilst sterilizing and disinfection your feet.

Package includes:

Main foot Pedi tank
Power cord
Free essence bag
Instruction book

Specifications:

Voltage:	220V
Power:	100 watt
Net weight	9 kg
Frequency	50- 60 HZ
